## Professional Summary

Seasoned Front-end Software Engineer with 5 years of hands-on experience building production-ready web applications, specializing in VueJS and modern JavaScript frameworks. Adept at architecting, modernizing, and delivering performant and maintainable codebases for SaaS and interactive platforms. Demonstrated ability to work autonomously and collaboratively in fully remote, asynchronous teams. Proven track record of shipping user-centric features, owning projects end-to-end, and contributing to team knowledge through robust documentation and code organization. Passionate about building engaging, reliable applications that delight end-users and drive business growth.

---

## Education

### ISTY - Institut des Sciences et Techniques des Yvelines

Master's degree in Mecatronics Engineering  
September 2018 - September 2021

---

## Work Experience

### SupaDev

#### Founder & Lead Developer

September 2021 - Present

- Spearheaded the development of innovative full-stack solutions with a strong focus on speed and scalability using the Nuxt framework.
- Successfully closed contracts with over 10 clients, managing the delivery of operational MVPs and SaaS platforms that met diverse client needs.
- Ventured into the blockchain domain, creating decentralized applications that integrate cutting-edge financial technologies.
- Mentored a junior developer, fostering skills development and ensuring successful collaboration on significant client projects, thereby enhancing project deliverables and timelines.

### Clairly

#### CTO

August 2022 - June 2024

- Led the technological strategy for platform advancements, integrating AI for enhanced tenant assessments.
- Spearheaded three platform versions, aligning technology to support growth in a trust-centric environment.

### Stellantis

#### Apprentice Safety Engineer

September 2018 - September 2021

- Revolutionized a critical safety procedure through automation, increasing process efficiency.
- Ensured system reliability and extended product lifecycle.

---

## Skills

- **Front-end:** VueJS (Vue 2 & 3, Option and Composition API), Nuxt (2, 3, 4), JavaScript, TypeScript, HTML5, CSS3 (Grid, Flexbox, preprocessors), TailwindCSS
- **Testing & Quality:** Cypress E2E, Jest, Storybook, CI/CD best practices, Git workflows, Vitest
- **Architecture:** API development, performance optimization, large codebase organization, maintainability
- **Collaboration:** Remote team communication, Agile/Scrum, technical documentation
- **Additional:** Apollo GraphQL (WebSockets), PostgreSQL, Hasura, Cloud (AWS), Blockchain basics
- **Tools:** Figma, GitHub, GitLab
